

Invented for life

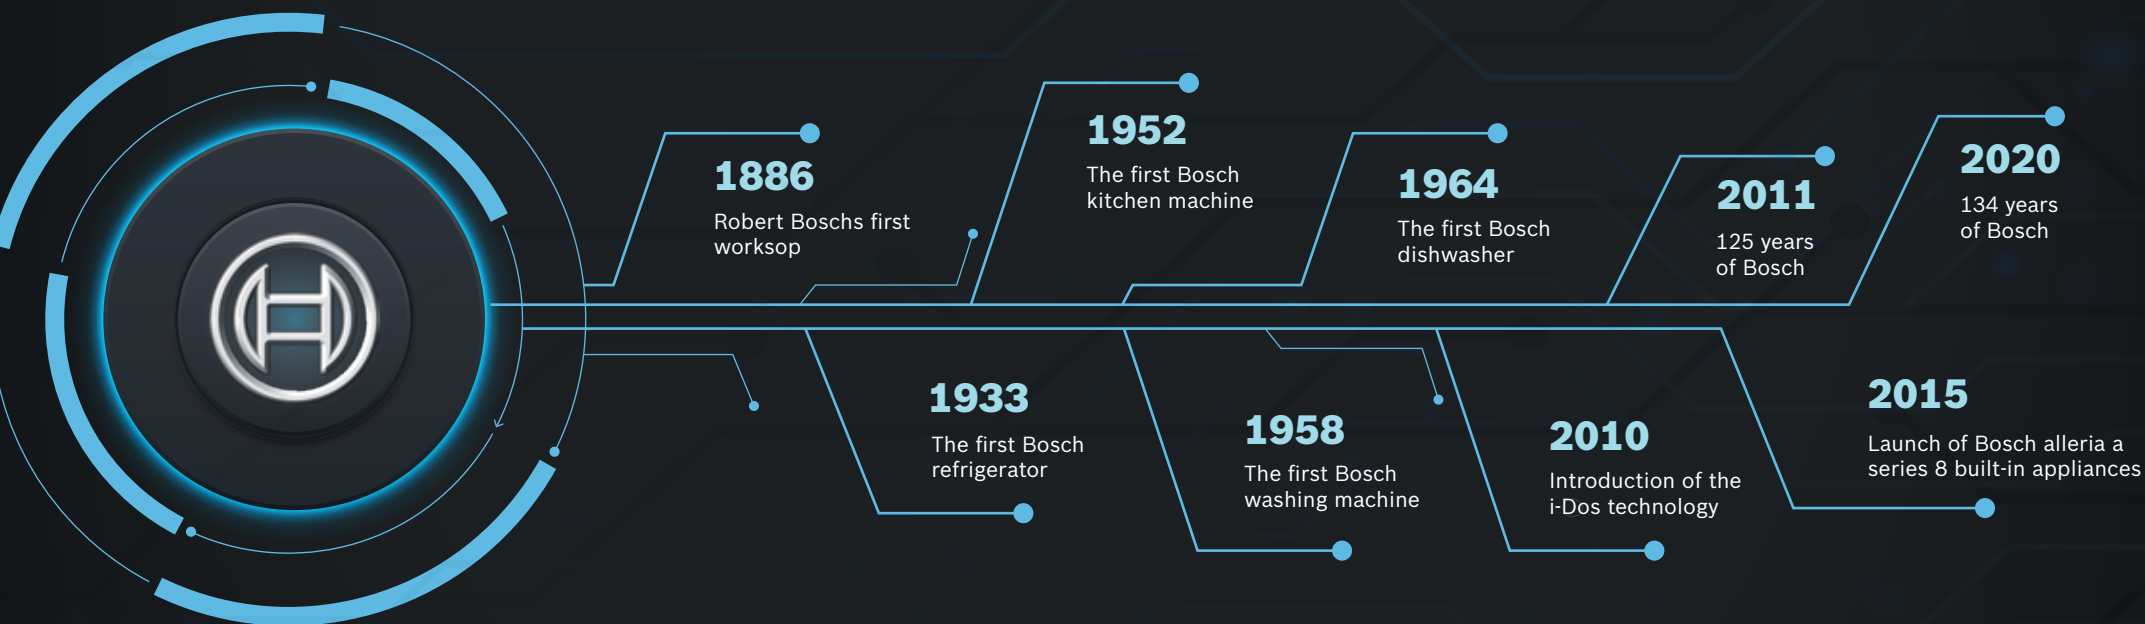

# German Engineered Bosch Home Appliances.

Bosch Over  
**100 Years**  
in India  GERMAN  
ENGINEERING

# Bosch in every detail. German Engineered.

Every detail of every appliance has been carefully designed, produced and tested by our engineers to fully satisfy the highest standards in quality, performance and convenience. The result is cutting-edge technology, timeless design and remarkable ease of use, reducing the workload for you in the kitchen and consistently delivering perfect results.

# Why choose **Bosch**?

## German Engineering

Before our washing machines leave our factory, we test every tiny detail and subject them to extensive stress tests. Only whenever one of the 1,000 or so components in our washing machines meets our high standards of function, quality and reliability 100%, is a Bosch appliance ready to face its most important challenge: being used by you at home.

## Proven Quality

Bosch appliances offer premium quality, advanced technology, easy to operate and outstanding German made and engineered technology. These attributes have earned us many national and international accolades, such as the reddit Design Award, the iF product design award and other endorsements, year after year.

## Top Performance

What drives us every day is our desire to improve. We strive to make the best even better, by developing functional, durable and energy-efficient innovations that surpass all expectations.

## Water Saving

We don't do things by halves. Except when it comes to saving water. Have you ever tried to halve your water consumption? We have. Since 1990, we've been able to cut the water consumption of our appliances by more than half.
