WHY TOSHIBA AIR PURIFIERS?

The first thing that comes to our mind while thinking of air pollution is smog and car emissions. This is called outdoor air pollution. But indoor air pollution is more dangerous as the air is more concentrated in closed spaces. Indoor air pollution occurs when pollutants like dust particles and gases contaminate the air of indoor areas. These air pollutants can cause respiratory diseases. Removing the air pollutants can improve the quality of your indoor air.

Toshiba Air Purifiers with Ioshield Technology and multistage purification improve the quality of your indoor air and make the environment pure and safe.

IOSHIELD

With just a click of a button, very small sized allergens and other airborne particles can be removed through Ioshield Technology. It releases ions which attach themselves to the remaining allergens and make bigger particles, which then settle on the ground and cannot be inhaled.

When oxygen in the air is charged by the sterilizer, negative ions are generated.

Negative ions bind with the airborne pollutants such as dust, pollen, smoke and PM2.5.

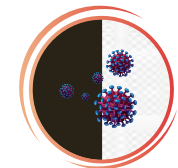

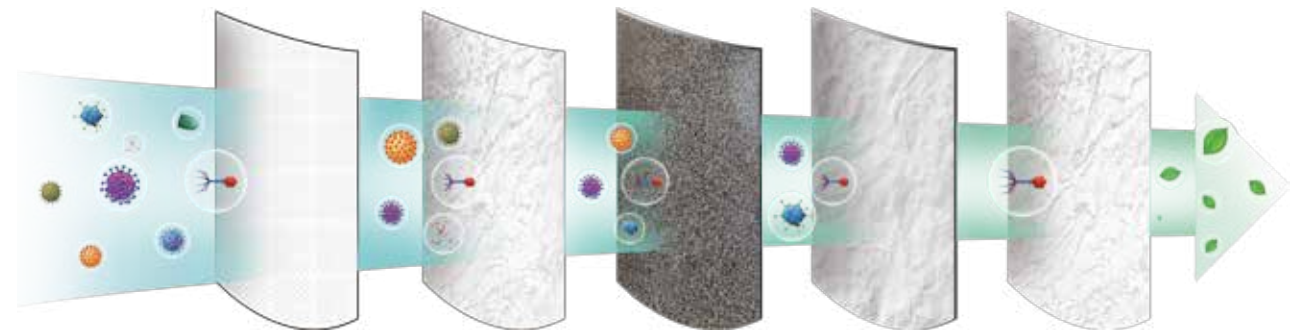

Charge neutralization occurs. The air pollutants subside naturally to the ground instead of being inhaled.

AIRTRAC

Toshiba Air Purifiers continuously monitor the air quality and display it through different sets of colours.

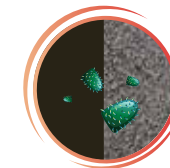

MULTISTAGE PURIFICATION

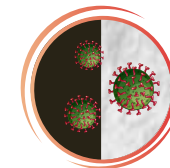

PRE FILTER
Blocks large particles

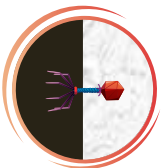

PET FILTER
Filters out pet dander

ACTIVE CARBON FILTER
Absorbs formaldehyde, TVOCs etc.

HEPA FILTER
H11/13 Grade HEPA Filter. Filters out PM2.5 and other smaller particles

PET FILTER
Protect & support

GERM PROTECTION

With the combination of Toshiba Filters and Ioshield Technology, even the minutest of allergens get easily trapped to give you pure and healthy air.

PRODISPLAY

Airtrac Technology indicates the existing indoor air quality. Along with it, selective models also indicate the real time PM2.5 value of indoor air.

SILENT CARE

Noise level of Toshiba Air Purifiers ranges between 20-25dB at Sleep mode, giving you a peaceful and pure surrounding.

CAF-W116XIN

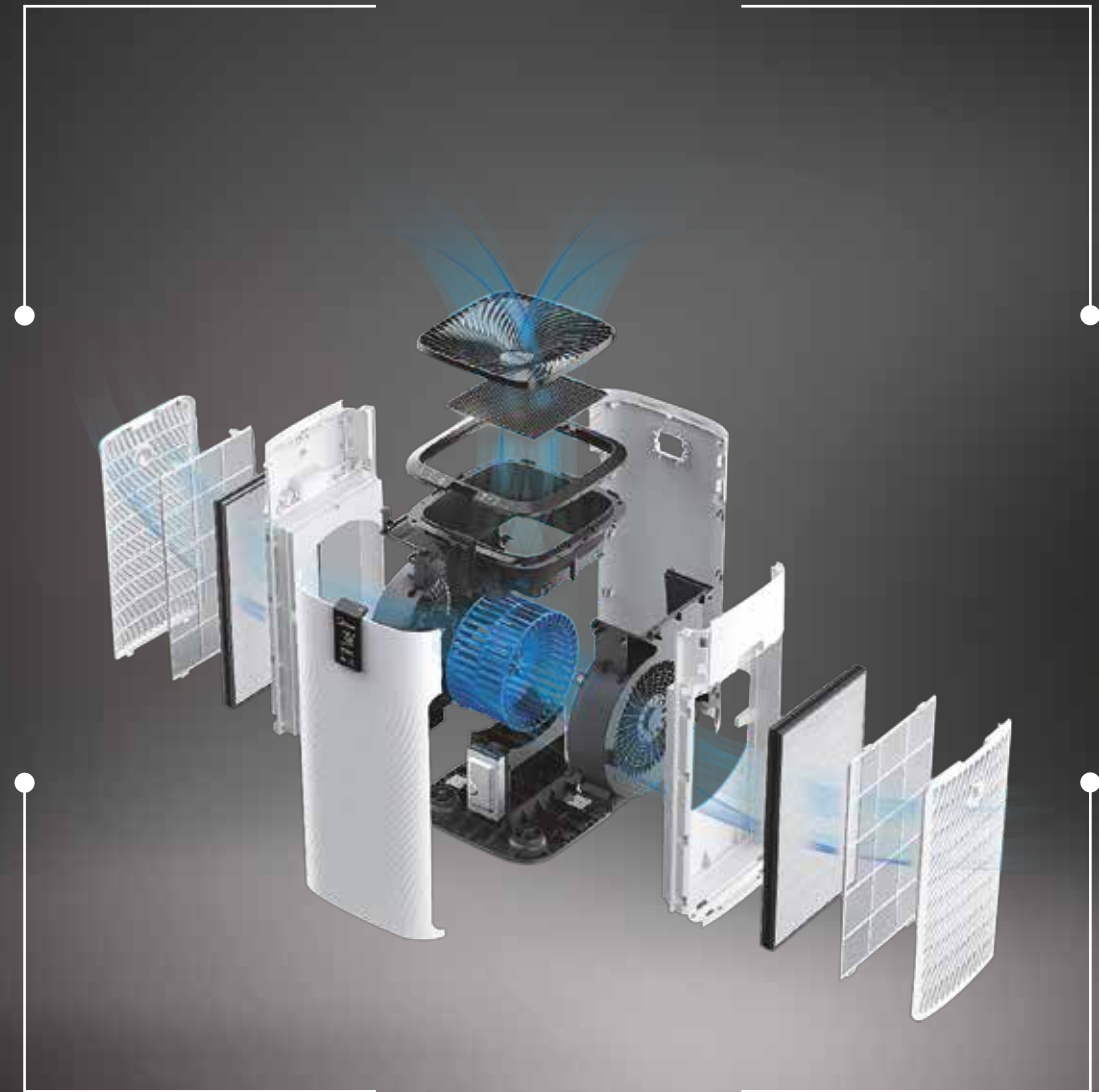

- **IOSHIELD**
- **MIRTRAC**
- WIDER PURIFYING COVERAGE
- HIGHER CLEAN AIR DELIVERY RATE
- SILENT CARE:
23dB NOISE AT SLEEP MODE
35dB NOISE AT HIGH SPEED MODE

DUAL HEPA FILTERS FOR COVERAGE OF 84 sq. m AREA

700m³/h
PM2.5 CADR

260m³/h
Toluene CADR

400m³/h
Formaldehyde CADR

260m³/h
Tvoc CADR

5 LAYER DUAL FILTER PROTECTION

REAL TIME AIR QUALITY DISPLAY

PM2.5 Indicator:

Large screen display to track the PM2.5 level of indoor air (A real time value display of PM2.5 level in the air). Grade display shows the quality of air through Great, Good, Medium and Poor indicators. With every change in the grade of air quality, light indicator changes its color.

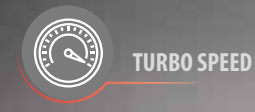

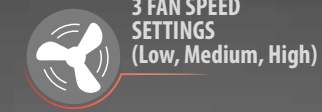

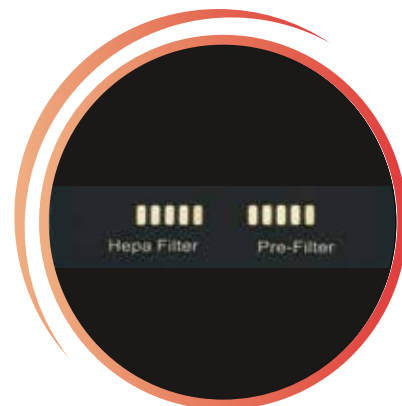

Gaseous Pollutants Indicator:

Not only PM2.5 level but the level of gaseous pollutants in the atmosphere can also be detected. Grade display shows the level of gaseous pollutants in the air through Great, Good, Medium and Poor indicators. With every change in the grade of air quality, light indicator changes its color.

Filter Life Indicator:

Two progress bars indicate the life/service of pre-filter and compound filter. Basis this, prompts are displayed for filter cleaning or replacement.
